

1. Which of the following are real constants?

3, 'A', 4.5, 3.0, '+', -25, -0.0

Ans:- 4.5, 3.0, -0.0

2. Which of the following are not keywords in C Language?

auto,

dynamic, static, typedef, define, enum, is, default, this, super

Ans- dynamic, define, is, this, super

3. Which of the following is not a valid variable name in C language?

Ans- Variable name cannot start with a digit.

4. Can we make a variable with the name switch? (Yes or No)

Ans- yes

5. Keywords are defined in the compiler or their meaning is stored in the library?

Ans:- C Standard library functions or simply C Library functions are inbuilt functions in C programming. The prototype and data definitions of these functions are present in their respective header files. To use these functions we need to include the header file in our program.

6. Where variables are created? (RAM, ROM, Secondary Storage or CPU)

Ans:- RAM

7. Who developed C Language?

Ans:- Dennis Ritchie

8. When was the C language developed?

Ans:- 1972

9. What is the name of the operating system which is responsible for the inception of the C language?

Ans:- Unix

10. Whether language is a high level or low level programming language?

Ans:- C is considered as a middle level language because it supports the feature of both low-level and high level language. C language program is converted into assembly code, supports pointer arithmetic (low level), but it is machine independent (feature of high level)
